

CERTIFICATE OF COMPLIANCE

REGARDING CONTACT WITH FOODSTUFF FOR **ADESTOR THERMAL TOP+** SELF-ADHESIVE FACESTOCK (BFR XXXVI)

Over the last years, the basic legislation that has been leading at the European level for materials and articles intended to come into contact with food is Regulation 1935/2004/EC. This Regulation has made provision for the adoption of specific directives or measures relating to particular groups of materials or articles. However so far, no specific measure has been introduced for paper and board at the level of the European Union.

The already existing and widely used German Recommendation BfR XXXVI (*Bundesinstitut für Risikobewertung*) sets compositional limits and seems to be a more appropriate basis for regulation and control.

Thus, as per the information available on tests done in independent testing laboratories, our Adestor Thermal Top+ facestock complies with the Recommendation BfR XXXVI and at the same time with the analytical requirements of Regulation 1935/2004/EC. Thermal Top + is suitable for direct contact with such kind of foodstuffs which are washed, shelled and/or peeled before consumption according to our experience. In all other cases, a direct food contact is not foreseen and should be avoided by using a functional barrier.
