

Generating value with InkJet labels

When talking about digital printing, inkjet technology is one of the key techniques that offers a wide range of possibilities to communicate efficiently and with a high degree of personalization.

Color offers eye-catching possibilities and with Adestor InkJet products we invite you to move a step forward on:

Customizing full color labels with a high quality face paper finish

Improving the time-to-market on new product launch

Reducing waste when changing printing designs or due to obsolete stock on pre-printed labels

Offering shorter, cost-effective runs and faster delivery times

Adestor InkJet solutions

- Our commitment with sustainability is now visible at the product name level: both grades, High Gloss and Matt finish, are FSC® certified
- All our products have been produced using market standard *White Glassine 62gr* for automatic dispensing when needed
- A new 150cm jumbo width for better reel format combination
- A 1000m2 minimum order quantity to support business growth
- [High gloss](#) and [Matt](#) finish paper grades
- General purpose permanent A-251 adhesive or extra-permanent SP-123 adhesive for demanding applications
- Suitable for dye based (Vip Color, SwiftColor, Primera or Screen) or pigmented (Epson) InkJet printing technologies.
